EDUCATION

Cal State University, Fullerton   **Expected May 2026**
Bachelor of Science, Computer Science   Fullerton, CA
Relevant Coursework: Object Oriented Programing, Calculus 2, Data Structures

Arnold O'Beckman High School   **Aug. 2018 - May. 2022**
High School Diploma   Tustin, CA
Relevant Coursework: AP Computer Science

EXPERIENCE

ASSURE-US Summer Research Program   **Jun. 2023 – Aug. 2023**
Computer Science Research   Fullerton, CA
- Learned and Reviewed C++ and advanced math equations
- Created a C++ project that applied pairs trading strategies to a pair of stocks

Icera LLC   **Sep. 2021 – Present**
Data Entry   Huntington Beach, CA
- Added, verified and edited billing data for Icera LLC
- Required quick and accurate typing skills

PROJECTS

Sneaker Reselling Calculator Website   **In Progress**
- Personal summer project that calculates which reselling website will give the most profit
- Learned Html and Css for the front-end development with C++ for the back-end development
- In the future, the website will have the current market prices for specific items from reselling sites

Pairs Trading Project   **Jul 2023**
- Designed and implemented coding program that calculates whether a pair of stocks is able to be traded as a pair coded in C++
- Project was required for the ASSURE-US Summer Research Program
- The program would take the stock price history of 2 stocks and find the mean, maximum, minimum, rangle, absolute range, standard deviation, variance, and coefficient correlation

Pong Game Project   **May 2022**
- Designed and programed a working pong game using java on the Eclipse IDE
- Pong required a strong understanding of the java language and object oriented programming
